[Fix Microsoft Outlook Mac](#)

Outlook

Error: Could not synchronize record.

Error: Could not synchronize record.
Details: Operation would change object type, which is not permitted.
Error code: -19703 *

I'm running Outlook 365 on Mac OS 10.9.5

I have been getting this error ever since I deleted a particular recurring even from my calendar. I have tried to enable logging, following these instructions (<http://support.microsoft.com/kb/2872257/en-us>), but no log file is ever created.

Any help, on either issue, would be appreciated.

Thanks
